Rocks and their uses

★☆☆ Grade 2

Learning goals

- Name rocks.
- Match rocks to uses.

1 Write the name of each rock. [5]

A B C D E

A	B	C	D	E
granite	sandstone	marble	slate	chalk

2 Draw a line to match the rock to its use. [4]

Draw a line to match each pair, or write the letter.

slate ●	→ A	● **A** roofs
chalk ●	→ C	● **B** floors and statues
marble ●	→ B	● **C** writing on boards
clay ●	→ D	● **D** bricks

3 What is soil made of? Tick. [4]

	In soil?
tiny bits of rock	✓
dead leaves (humus)	✓
water and air	✓
plastic

Rocks change

★★☆
Grade 2

Learning goals

- Explain how rocks break down.

1 **Put the pictures in order to show how rock becomes soil.** [3]

5	soil
1	a big rock
4	sand
2	cracks in the rock
3	small stones

2 **How can a tiny plant root break a rock?** [2]

The root grows into a crack and pushes, making the crack bigger until the rock breaks.

3 **Why are pebbles in a river smooth and round?** [2]

The water rolls them and they rub against each other, wearing off the sharp edges.

INVESTIGATE · B2 · ROCKS AND SOILS

Which soil holds most water?

★★☆
Grade 2

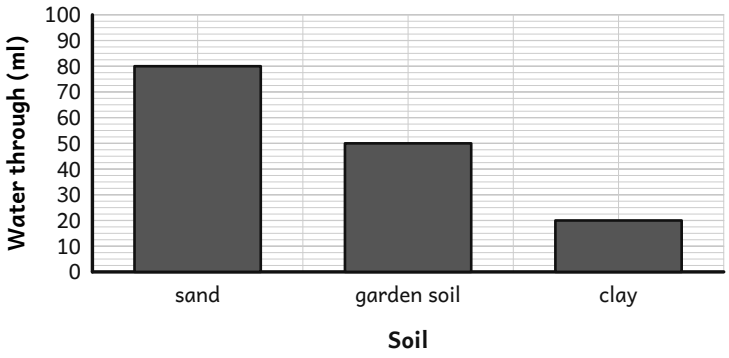

Learning goals

- Do a fair test.
- Measure water.

Class 2C put the same amount of sand, garden soil and clay into three funnels. They poured 100 ml of water on each and measured how much dripped through.

1 **Draw a bar chart of the water that dripped through.** [3]

Soil	sand	garden soil	clay
Water through (ml)	80	50	20

2 **Which soil let most water through?** [1]

sand

3 **Which soil held most water?** [1]

clay

4 **What did they keep the same?** [1]

the amount of soil and water, the funnels

REAL-WORLD CASE STUDY · B2 · ROCKS AND SOILS

The brick kiln

★★★
Grade 2

Learning goals

- Learn how soil is used to make bricks.
- Think about good and bad effects.

Science | Building | Environment

Near many towns in Bangladesh you can see tall chimneys. These are **brick kilns**. Workers dig up **clay soil**, mix it with water, shape it into blocks and bake them in a very hot fire. The soft clay becomes hard **bricks** for houses, schools and roads.

But brick kilns can cause problems: they use up good farm soil, and the smoke makes the air dirty. New kilns use cleaner fires and some builders use blocks made without burning.

Based on brick making in Bangladesh.

1 **Put the steps in order.** [4]

5 hard bricks

1 dig up clay

4 bake in a fire

2 mix with water

3 shape into blocks

2 **Give one good thing and one problem about brick kilns.** [2]

Good: bricks to build houses and schools. Problem: smoke pollutes the air; farm soil is used up.

REVIEW AND CHALLENGE · B2 · ROCKS AND SOILS

Show what you know

★★★
Grade 2

Learning goals

- Use rock words.

1 Find the words.

H	B	T	O	K	M	I	S
A	G	S	N	R	O	C	K
C	M	C	L	C	L	A	Y
L	H	B	P	A	P	G	V
B	S	A	I	T	T	I	V
F	A	O	L	U	J	E	C
J	N	I	I	K	O	B	T
G	D	N	E	L	W	D	R

chalk clay rock sand slate soil

2 Which rock is soft and used for writing on boards? [1]

○ granite
● **chalk**
○ marble

3 Soil is made from tiny bits of... [1]

○ plastic
● **rock**
○ glass

4 Challenge. Draw the layers of soil and label two layers. [2]

Soil layers

humus/topsoil, subsoil, bedrock.
