Who lives where?

★☆☆
Grade 3

Learning goals

- Match animals to habitats.
- Use a key.

1 Draw a line from the animal to its habitat. [5]

Draw a line to match each pair, or write the letter.

fish ●	→ E	● **A** desert
monkey ●	→ D	● **B** soil
camel ●	→ A	● **C** cold ice
earthworm ●	→ B	● **D** forest trees
polar bear ●	→ C	● **E** river

2 Use the key on the Learn it page. Name the animal: it has legs, but not 6 legs. [1]

frog

3 Write the name of each animal under its habitat. [4]

river or sea

sky, tall trees

soil

forest

Why do they live there?

★★☆
Grade 3

Learning goals

- Explain adaptations.

1 Why couldn't a fish live in a tree? [2]

It breathes with gills in water and has fins, not legs; it would dry out.

2 How is a duck suited to living on a pond? [2]

Webbed feet for swimming and waterproof feathers.

3 Make your own key to sort a bird, a snake, a cow and a fish. [3]

My key

e.g. Does it have legs? Yes → Does it have feathers? (bird / cow). No → Does it live in water? (fish / snake).

Where do woodlice like to live?

★★☆
Grade 3

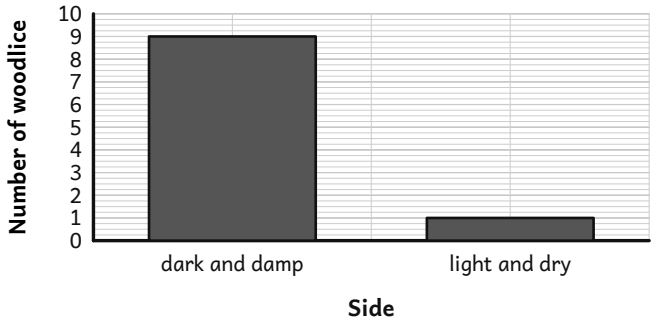

Learning goals

- Do a fair test.
- Count and compare.

Class 3A put 10 woodlice in a tray. One end was dark and damp, the other light and dry. After 10 minutes they counted them.

1 **Draw a bar chart.** [2]

Side	dark and damp	light and dry
Woodlice	9	1

2 **Where do woodlice prefer to live?** [1]

in dark, damp places

3 **Suggest why.** [2]

They dry out easily, and dark damp places (under logs and stones) keep them safe from birds.

4 **How should they treat the woodlice afterwards?** [1]

Put them back gently where they were found.

The baya weaver's hanging nest

★★★
Grade 3

Learning goals

- Learn how an animal changes its habitat.

Science | Design | Nature

The **baya weaver** is a small bird found in Bangladesh. In the rainy season, the male weaves an amazing nest from strips of grass and palm leaves. It hangs from the tip of a branch, often over water.

The nest has a long tube for a door at the bottom. Snakes and big birds find it very hard to reach the eggs. The weaver has changed its habitat to make a safe home for its babies.

Based on the behaviour of the baya weaver (babui pakhi).

1 **How does the nest keep the eggs safe?** [2]

It hangs from a thin branch over water with a long tube entrance, so snakes and big birds cannot reach it.

2 **What materials does the weaver use?** [1]

strips of grass and palm leaves

3 **Design a safe home for an animal you like. Draw and label it.** [3]

My animal home

Any reasoned design with labels showing food, water and shelter.

Show what you know

★★★
Grade 3

Learning goals

- Use habitat words.

1 Find the words.

A	N	E	S	T	A	L	O	M
B	M	A	P	P	U	T	S	J
S	W	H	F	B	P	C	H	K
G	C	A	F	O	O	D	E	E
U	M	B	W	W	U	H	L	Y
T	V	I	A	B	B	E	T	F
I	V	T	T	E	I	J	E	J
C	N	A	E	H	D	I	R	H
F	B	T	R	B	M	D	J	U

food habitat key nest shelter water

2 Which animal is suited to living in trees? [1]

○ fish
● **monkey**
○ camel

3 A habitat gives an animal... [1]

● **food, water and shelter**
○ only toys
○ nothing

4 Challenge. What might happen to the monkeys if their forest is cut down? [2]

They lose food and shelter; they must move, or they may die.
