Name the landform

★☆☆ Grade 2

Learning goals

- Name landforms.

1 Write the name of each landform. [6]

A B C

D E F

A	B	C	D	E	F
mountain	hill	valley	cave	plain	island

2 Draw a line to match. [4]

Draw a line to match each pair, or write the letter.

island ●	→ A	● **A** land with water all round
valley ●	→ C	● **B** very high land
mountain ●	→ B	● **C** low land between hills
plain ●	→ D	● **D** wide flat land

3 Fast or slow?

[4]

SORT THESE

earthquake **landslide** **a mountain growing** **a river wearing away rock**

Fast change	Slow change
earthquake	a river wearing away rock
landslide	a mountain growing

Changing land

★★☆
Grade 2

Learning goals

- Explain how water and wind change land.

1 How can a river make a new island (char)? [2]

The river drops sand and mud in the middle, and it builds up into new land.

2 A flood brings new mud to a farmer's field. Is this good or bad? Why? [2]

Good: the mud makes the soil rich for crops. (But floods can also damage homes.)

3 Draw a landform you have seen. Label it. [2]

A landform I have seen

e.g. a river and its bank, a hill, the beach.

INVESTIGATE · B1 · LANDFORMS

Rain on a sand hill

★★☆
Grade 2

Learning goals

- Make a model.
- Observe and explain.

Class 2B made two sand hills on trays. They covered one with grass. Then they poured the same amount of water on top of each one, like rain.

1 **What do you think will happen? Predict.** [1]

The bare hill will wash away more.

2 **Results: draw the two hills after the "rain".** [2]

bare sand hill
flatter, sand washed down

hill with grass
still mostly the same shape

3 **Which hill washed away more? Why?** [2]

The bare hill; grass roots hold the sand together.

REAL-WORLD CASE STUDY · B1 · LANDFORMS

A new island in the river

★★★
Grade 2

Learning goals

- Learn about chars in Bangladesh.

Science | Geography | People

In the big rivers of Bangladesh, sand and mud slowly pile up to make new islands called **chars**. After a few years, grass grows on them. Then families come to live there. They grow rice, keep cows and catch fish.

But the river is always moving. Sometimes it washes part of a char away, and families must move their houses. Char people are very good at changing their plans when the river changes.

Based on life on river chars in Bangladesh.

1 **How is a char made?** [2]

The river drops sand and mud, which piles up into new land.

2 **What do families do on a char?** [2]

grow rice, keep cows, catch fish

3 **Is a char a fast change or a slow change? Explain.** [1]

Mostly slow: it builds up over years (but parts can wash away quickly in floods).

REVIEW AND CHALLENGE · B1 · LANDFORMS

Show what you know

★★★
Grade 2

Learning goals

- Use landform words.

1 Find the words.

E	A	D	I	E	S	M	S
P	K	P	S	C	A	V	E
H	L	V	L	P	I	R	E
I	H	A	A	L	P	A	W
L	O	L	N	A	Y	V	J
L	T	L	D	I	H	Y	K
Y	H	E	Y	N	W	K	L
Y	D	Y	R	I	V	E	R

cave hill island plain river valley

2 Land with water all around it is... [1]

○ a valley
● **an island**
○ a cave

3 Most of Bangladesh is... [1]

● **a flat plain**
○ high mountains
○ desert

4 Challenge. Draw a picture with a mountain, a valley and a river. [3]

My landscape

Mountain with a valley below and a river flowing through it.
