The Sun, the Moon and the stars

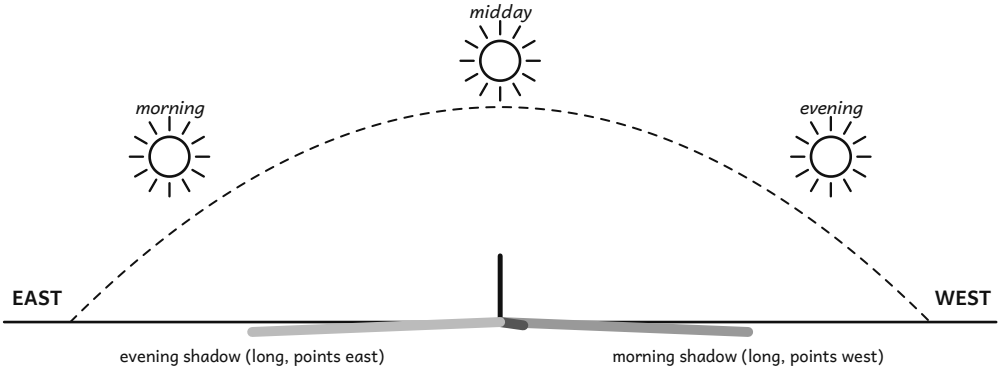

★☆☆
Grade 1

Name: Class: Date:

Learning goals

- Say how the Sun seems to move.
- Explain day and night.

Every morning the **Sun rises** in the east. It climbs high in the sky at midday, and in the evening it **sets** in the west.

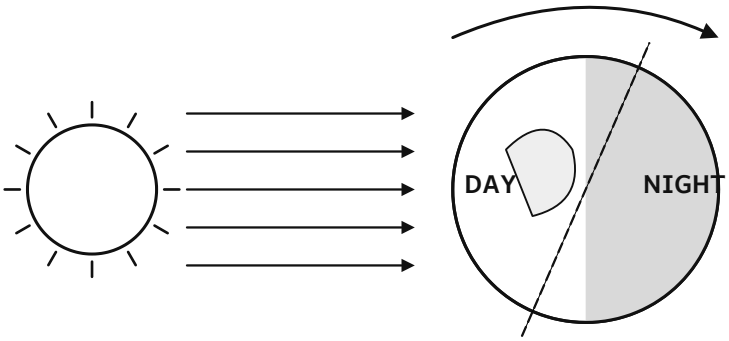

The Sun seems to move across the sky. Shadows change too.

Shadows are **long** in the morning and evening, and **short** at midday when the Sun is high.

Why do we have day and night?

The Sun does not really move. **The Earth spins!** The side facing the Sun has **day**. The side facing away has **night**. You can show this with a torch and a ball.

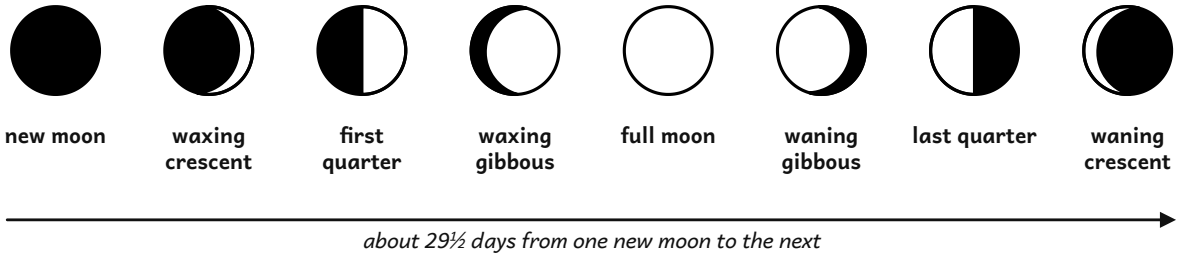

The Earth spins on its axis once every 24 hours.

Day and night on the spinning Earth.

The Moon and stars

At night we can see the **Moon** and the **stars**. The Moon also rises and sets. Its shape seems to change during the month.

The Moon's shapes in one month.

Bangladesh connection

The Sun and Moon matter to people. Muslims break their fast at **sunset** during Ramadan, and **Eid** begins when the new Moon is seen. **Pohela Boishakh** welcomes the new year of the Bangla calendar.

Stay safe

Never look straight at the Sun. It can hurt your eyes.

FACT CHECK · B1 · SUN AND MOON

Sky facts

★☆☆
Grade 1

Name: Class: Date:

Learning goals

- Recall sky facts.

1 Fill in the gaps.

WORD BANK

east west spins north stops

The Sun rises in the _____ and sets in the _____. The Earth _____, so we have day and night.

2 Day or night?

Cut out the pictures and stick them in the right box, or draw them.

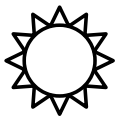

stars

Moon

sunrise

Sun

Day	Night

3 True or false?

Statement	True	False	If false, correct it
1. Shadows are shortest at midday.			
2. The Moon makes its own light.			

Explain it

★★☆
Grade 1

Name: Class: Date:

Learning goals

- Explain day and night.

1 Use a torch and a ball to show day and night. Draw it.

My model

2 Why is it night in some countries when it is day in Bangladesh?

Shadow watch

★★☆ Grade 1

Name: Class: Date:

Learning goals

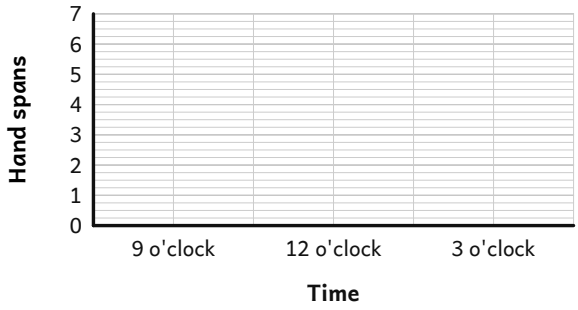

- Measure a shadow through the day.
- Find a pattern.

For the grown-up

Put a stick in the ground in a sunny place. Measure its shadow with hand spans at 9 o'clock, 12 o'clock and 3 o'clock.

1 Our shadow results.

Time	9 o'clock	12 o'clock	3 o'clock
Shadow (hand spans)	6	1	5

2 When was the shadow shortest?

◯ 9 o'clock ◯ 12 o'clock

◯ 3 o'clock

3 Why?

.....

REAL-WORLD CASE STUDY · B1 · SUN AND MOON

Waiting for the new Moon

★★★
Grade 1

Name: Class: Date:

Learning goals

- Read about the Moon in our culture.

On the last evening of Ramadan, Imran's family went up to the roof after sunset. Everyone looked at the western sky.

"There it is!" shouted Imran. A very thin new Moon was shining low in the sky. "Eid Mubarak!" said his grandmother. Tomorrow would be Eid.

1 **Where did the family look for the Moon?**

2 **Why was seeing the new Moon important?**

REVIEW AND CHALLENGE · B1 · SUN AND MOON
