EARTH AND SPACE

Landforms and Changes

Mountains, hills, valleys, caves, plains and islands, and how wind and water change the land

In this pack

- **Learn it:** Mountains, rivers and islands ★☆☆
- **Fact check:** Name the landform ★☆☆
- **Think it through:** Changing land ★★☆
- **Investigate:** Rain on a sand hill ★★☆
- **Real-world case study:** A new island in the river ★★★
- **Review and challenge:** Show what you know ★★★

LEARN IT · B1 · LANDFORMS

Mountains, rivers and islands

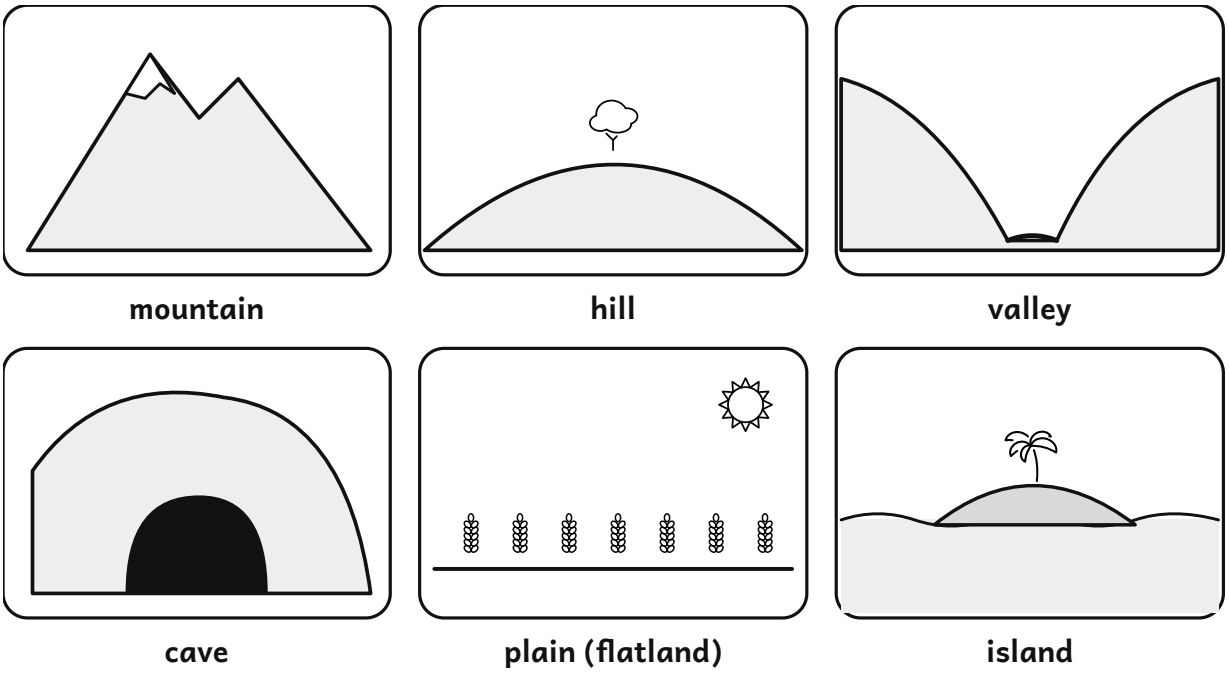

★☆☆ Grade 2

Name: Class: Date:

Learning goals

- Name landforms: mountains, hills, valleys, caves, plains and islands.
- Find landforms in Bangladesh and in other countries.
- Explain how wind and water change the land, quickly or slowly.

The land is not flat everywhere. There are high mountains, round hills, deep valleys and islands in the sea. These shapes of the land are called **landforms**.

Six landforms.

Landform	What it is
mountain	very high land with steep sides
hill	raised land, lower and rounder than a mountain
valley	low land between hills or mountains, often with a river
cave	a big hole in rock, under the ground or in a hill
plain	wide, flat land
island	land with water all around it

Landforms in Bangladesh

Most of Bangladesh is a huge, flat **plain**, made by rivers. In the south-east there are **hills** in Chattogram, Rangamati and Bandarban. There are many **islands**, such

as Saint Martin's Island and Bhola. Other countries have different landforms: Nepal has the tallest **mountains** in the world, including Mount Everest.

Wind and water change the land

Rivers carry away soil from their banks and drop it in other places, making new land called **chars**. **Rain** washes soil down hills. **Waves** wear away the coast. **Wind** blows sand into dunes on beaches.

Fast and slow changes

Fast changes	Slow changes
earthquakes shake the ground	rivers slowly wear away rock
volcanoes erupt with hot lava	wind slowly moves sand
floods and **landslides** happen in a day	mountains take millions of years to grow

Changes can be **good**: floods bring rich new soil for crops. They can be **bad**: river banks fall in and people lose their homes.

Bangladesh connection

Keokradong in Bandarban is one of the highest hills in Bangladesh, about 1000 metres high.

Key words

landform a natural shape of the land
plain flat land
island land with water all round
erosion land worn away by water or wind

FACT CHECK · B1 · LANDFORMS

Name the landform

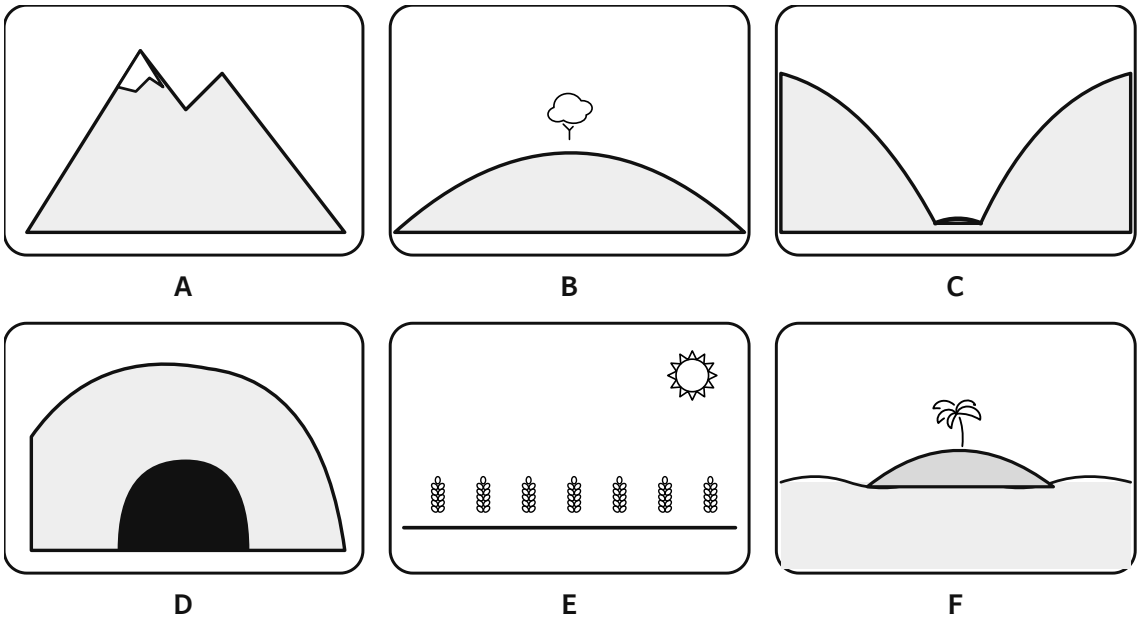

★☆☆
Grade 2

Name: **Class:** **Date:**

Learning goals

- Name landforms.

1 Write the name of each landform. [6]

A B C

D E F

A	B	C	D	E	F

2 Draw a line to match. [4]

Draw a line to match each pair, or write the letter.

island ●	● **A** land with water all round
valley ●	● **B** very high land
mountain ●	● **C** low land between hills
plain ●	● **D** wide flat land

3 Fast or slow?

[4]

SORT THESE

earthquake **landslide** **a mountain growing** **a river wearing away rock**

Fast change	Slow change

THINK IT THROUGH · B1 · LANDFORMS

Changing land

★★☆
Grade 2

Name: Class: Date:

Learning goals

- Explain how water and wind change land.

1 **How can a river make a new island (char)?** [2]

2 **A flood brings new mud to a farmer's field. Is this good or bad? Why?** [2]

3 **Draw a landform you have seen. Label it.** [2]

A landform I have seen

INVESTIGATE · B1 · LANDFORMS

Rain on a sand hill

★★☆
Grade 2

Name: Class: Date:

Learning goals

- Make a model.
- Observe and explain.

Class 2B made two sand hills on trays. They covered one with grass. Then they poured the same amount of water on top of each one, like rain.

1 **What do you think will happen? Predict.** [1]

2 **Results: draw the two hills after the "rain".** [2]

bare sand hill

hill with grass

3 **Which hill washed away more? Why?** [2]

REAL-WORLD CASE STUDY · B1 · LANDFORMS

A new island in the river

★★★ Grade 2

Name: **Class:** **Date:**

Learning goals

- Learn about chars in Bangladesh.

Science | Geography | People

In the big rivers of Bangladesh, sand and mud slowly pile up to make new islands called **chars**. After a few years, grass grows on them. Then families come to live there. They grow rice, keep cows and catch fish.

But the river is always moving. Sometimes it washes part of a char away, and families must move their houses. Char people are very good at changing their plans when the river changes.

Based on life on river chars in Bangladesh.

1 **How is a char made?** [2]

2 **What do families do on a char?** [2]

3 **Is a char a fast change or a slow change? Explain.** [1]

REVIEW AND CHALLENGE · B1 · LANDFORMS

Show what you know

★★★
Grade 2

Name: _____ **Class:** _____ **Date:** _____

Learning goals

- Use landform words.

1 Find the words.

E	A	D	I	E	S	M	S
P	K	P	S	C	A	V	E
H	L	V	L	P	I	R	E
I	H	A	A	L	P	A	W
