Sort the waste

★☆☆
Grade 3

Learning goals

- Sort waste.
- Name the three Rs.

1 Sort the waste. [6]

SORT THESE

dead leaves **banana peel** **metal can** **cloth bag** **newspaper** **glass jar**

Compost	Recycle	Reuse
banana peel	newspaper	glass jar
dead leaves	metal can	cloth bag

2 Solid, liquid or gas waste? [4]

Waste	Solid, liquid or gas?
smoke from a fire	gas
dirty washing water	liquid
a plastic bottle	solid
carbon dioxide we breathe out	gas

3 Draw a line to match. [3]

Draw a line to match each pair, or write the letter.

reduce ●	→ C	● **A** use again
reuse ●	→ A	● **B** make into something new
recycle ●	→ B	● **C** use less

Less waste, cleaner world

★★☆
Grade 3

Learning goals

- Explain harm from waste.
- Plan to reduce it.

1 **How can plastic bags cause floods in a city?** [2]

They block drains, so rain water cannot flow away.

2 **Write three things your family can do to make less waste.** [3]

take cloth bags; compost food scraps; reuse jars; give paper to the recycler; buy less packaging.

3 **Why is compost good for a garden?** [2]

It adds goodness to the soil so plants grow well.

ANSWER KEY

INVESTIGATE · B3 · WASTE

What rots in the soil?

★★☆ Grade 3

Learning goals

- Observe over time.
- Record results.

Class 3B buried four things in soil in a pot and dug them up after four weeks.

1 **Complete the table.** [4]

Item	After 4 weeks	Rots (compostable)?
banana peel	mostly gone, soft and black	yes
paper	soft, falling apart	yes
plastic bag	no change	no
metal bottle cap	no change (a little rust)	no

2 **What does this tell you about plastic?** [2]

Plastic does not rot, so it stays in the environment for a very long time.

3 **Which living things helped the banana peel rot?** [1]

decomposers: worms, mould and microbes

REAL-WORLD CASE STUDY · B3 · WASTE

Turning rubbish into compost

★★★
Grade 3

Learning goals

- See how a community reduces waste.

Science | Citizenship | Maths

In Dhaka, a lot of household rubbish is food and vegetable waste. In some neighbourhoods, workers collect this waste from homes and take it to a **compost plant**.

They pile it up in boxes. Worms and microbes break it down. After about two months it becomes dark, crumbly **compost**, which is sold to farmers and gardeners. Less rubbish goes to the dump, and farmers get good soil.

Based on community composting projects in Dhaka (example numbers below).

1 **Why is food waste good for making compost?** [2]

It rots easily and becomes rich soil.

2 **A family makes 2 kg of food waste every day. How much in a week?** [1]

2 × 7 = 14 kg

3 **Make a poster for your school about the three Rs.** [3]

Three Rs poster

Reduce, reuse, recycle with pictures.

Show what you know

★★★
Grade 3

Learning goals

- Use waste words.

1 Find the words.

R	C	O	M	P	O	S	T	U
E	P	L	A	S	T	I	C	G
U	A	J	C	E	V	V	M	I
S	V	T	F	W	A	S	T	E
E	A	R	E	C	Y	C	L	E
E	K	H	L	R	I	D	M	I
R	E	D	U	C	E	A	D	O
C	S	U	U	E	O	A	H	L
H	R	T	M	P	L	A	V	C

compost plastic recycle reduce reuse waste

2 Which can be composted? [1]

○ a plastic bag
● **a mango peel**
○ a glass bottle

3 Taking a cloth bag to the shop is... [1]

● **reducing**
○ recycling
○ burning

4 Challenge. Design a bin system for your classroom. [3]

Classroom bins

Three bins: compost, recycle, rubbish, with pictures on each.
