Growing up

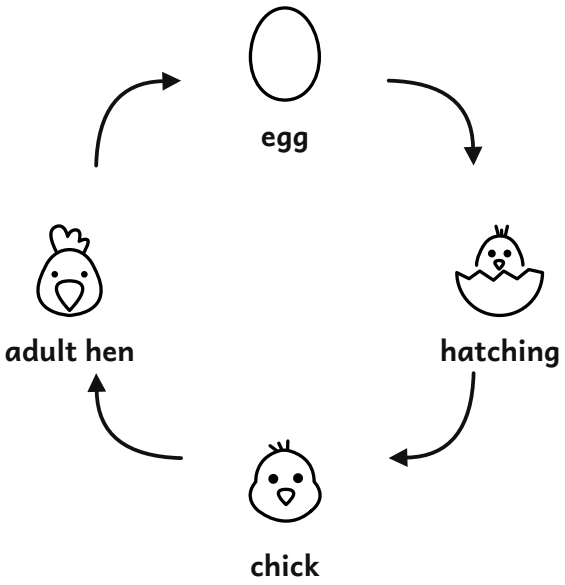

Name: Class: Date:

Learning goals

- Name the stages as animals grow: egg or baby, young, adult.
- Compare how people and animals grow.
- Say which places animals need at each stage.

Every animal starts small and grows. A chick hatches from an egg, a calf is born from a cow, and you were once a tiny baby! The stages of growing up make a **life cycle**.

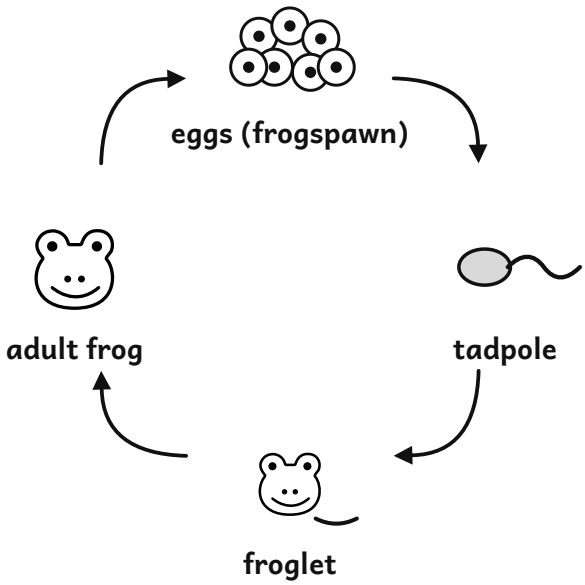

A chicken grows up

egg → chick → hen → egg

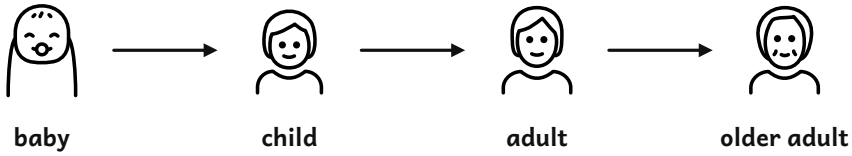

A frog grows up

A frog starts as an **egg** in a pond. A **tadpole** hatches. It lives in water and has a tail. It grows legs and becomes a **frog** that can live on land and in water.

The frog life cycle.

People grow up too

baby → child → adult → older adult

Babies grow into children. Children grow **taller** and **heavier**. They learn to walk, talk and read. Adults can have babies of their own. People do not change shape like frogs: a baby looks like a small person.

Measuring growth

We can measure **height** with a tape measure, **weight** with scales, and count **age** in years. Most children grow about 5 to 6 cm taller every year.

The right home at each stage

Animals need different places as they grow. Frog eggs and tadpoles need **pond water**. Chicks need a warm **nest** and their mother. Butterfly eggs are laid on **leaves** so the caterpillars can eat. A **habitat** is the place where an animal finds food, water and shelter.

Bangladesh connection

Hilsa fish lay their eggs in rivers. The baby fish grow in the river, then swim to the sea.

Key words

life cycle	the stages an animal goes through as it grows
hatch	come out of an egg
young	a baby animal
adult	fully grown
habitat	the place where an animal lives

FACT CHECK · A3 · LIFE CYCLES

Baby and adult

★☆☆ Grade 2

Name: _____ **Class:** _____ **Date:** _____

Learning goals

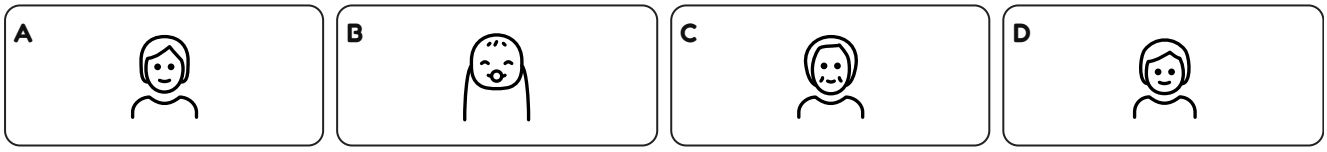

- Match young animals to adults.
- Order life cycle stages.

1 Draw a line to match the baby to its parent. [5]

Draw a line to match each pair, or write the letter.

chick ●	● **A** butterfly
tadpole ●	● **B** cow
caterpillar ●	● **C** cat
calf ●	● **D** frog
kitten ●	● **E** hen

2 Number the pictures in order, from youngest to oldest. [4]

3 Fill in the gaps. [3]

WORD BANK

hatches **smaller** **taller** **frog**

A chick _____ from an egg. A tadpole grows into a _____. As children grow they get _____.

THINK IT THROUGH · A3 · LIFE CYCLES

How do they change?

★★☆
Grade 2

Name: Class: Date:

Learning goals

- Describe changes as animals grow.
- Compare life cycles.

1 **How does a tadpole change as it grows into a frog?** [2]

2 **How is a baby like a grown-up? How is it different?** [2]

3 **Why does a frog lay its eggs in a pond, not on dry land?** [2]

INVESTIGATE · A3 · LIFE CYCLES

How tall are we?

★★☆
Grade 2

Name: Class: Date:

Learning goals

- Measure height.
- Compare and find a pattern.

Class 2A measured the height of a baby, a Grade 2 child, a Grade 5 child and a teacher.

1 Draw a bar chart. [3]

Person	baby (1 year)	child (7 years)	child (10 years)	teacher
Height (cm)	75	120	140	160

2 What is the pattern? [1]

3 Measure your own height. Write it here. [1]

REAL-WORLD CASE STUDY · A3 · LIFE CYCLES

Baby turtles on the beach

★★★
Grade 2

Name: **Class:** **Date:**

Learning goals

- Read about a real animal.
- Think about caring for animals.

Science | Geography | Caring for nature

On the beaches of Saint Martin's Island and Cox's Bazar, mother **sea turtles** come out of the sea at night. Each one digs a hole in the sand and lays about 100 eggs, then goes back to the sea.

After about two months, tiny baby turtles **hatch** and race to the sea. Bright lights and rubbish on the beach can make them lose their way. Volunteers protect the nests and help keep the beach dark and clean.

Based on turtle conservation work on the coast of Bangladesh.

1 **Put the turtle life cycle in order.** [3]

- ☐ they grow into adults
- ☐ baby turtles hatch
- ☐ mother lays eggs in the sand
- ☐ babies swim in the sea

2 **Where does a turtle need to be to lay eggs? Where does it grow up?** [2]

.....

.....

3 **How can people help baby turtles?** [2]

.....

.....

REVIEW AND CHALLENGE · A3 · LIFE CYCLES

Show what you know

★★★
Grade 2

Name: Class: Date:

Learning goals

- Use science words.

1 Find the words.
