Plant life cycle

★☆☆
Grade 3

Learning goals

- Sort plants.
- Order the life cycle.

1 Sort the plants. [6]

SORT THESE

rice **mango tree** **fern** **pine tree** **sunflower** **moss**

Flowering	Non-flowering
mango tree	fern
rice	moss
sunflower	pine tree

2 Number the stages in order. [4]

5 fruit with new seeds

1 seed

4 adult plant with flowers

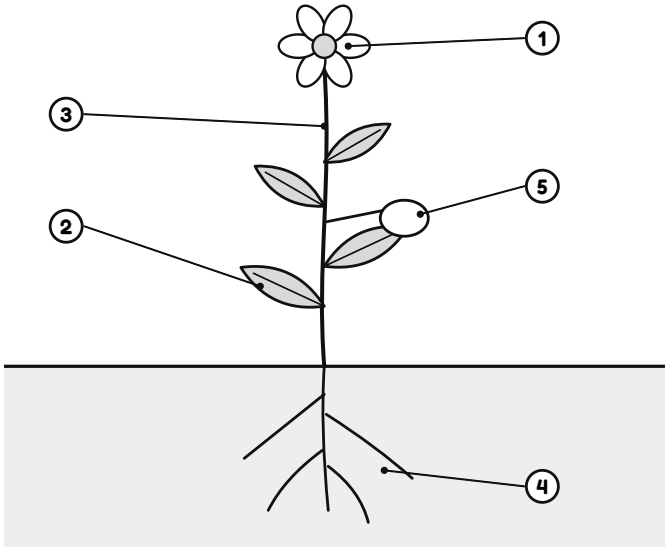

2 seed germinates

3 seedling

3 **Label the plant.** [5]

LABELS

flower leaf roots stem fruit

1 flower

2 leaf

3 stem

4 roots

5 fruit

THINK IT THROUGH · A2 · PLANT GROWTH

Growing and comparing

★★☆
Grade 3

Learning goals

- Compare life cycles.
- Explain plant needs.

1 **How is a plant life cycle like a chicken's? How is it different?** [2]

Same: both start small (seed/egg), grow into adults and make new young. Different: plants make seeds in fruits; chickens lay eggs.

2 **A seed is kept dry in a packet. Will it germinate? Why?** [2]

No: it needs water (and warmth) to germinate.

3 **Draw the life cycle of a bean plant with four stages and arrows.** [3]

Bean life cycle

seed → seedling → adult plant with flowers → bean pods with seeds.

How fast does a bean plant grow?

★★☆
Grade 3

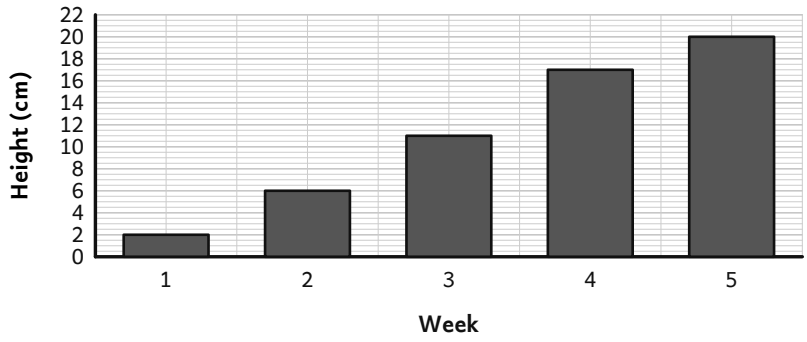

Learning goals

- Measure height each week.
- Draw a bar chart.
- Find a pattern.

Class 3C measured a bean plant every week.

1 **Draw a bar chart.** [3]

Week	1	2	3	4	5
Height (cm)	2	6	11	17	20

2 **Describe the pattern.** [1]

The plant grew taller every week.

3 **In which week did it grow the most?** [1]

Week 4 (6 cm more than week 3)

4 **Predict the height in week 6.** [1]

about 22–23 cm

REAL-WORLD CASE STUDY · A2 · PLANT GROWTH

A rice farmer's year

★★★
Grade 3

Learning goals

- Follow a real crop through its life cycle.

Science | Farming | Maths

Abdul is a rice farmer in Mymensingh. First he soaks rice seeds in water until they **germinate**. He plants them close together in a small bed of mud. After about a month the **seedlings** are moved to the big flooded field.

The rice plants grow tall and green. Tiny **flowers** appear, and the wind carries pollen. The grains (**seeds**) grow and turn golden. About four months after planting, Abdul **harvests** the rice. He keeps some seeds to plant next year.

Based on rice farming in Bangladesh.

1 **Put Abdul's year in order.** [4]

5	harvest the grains
1	soak seeds so they germinate
4	rice flowers
2	grow seedlings in a mud bed
3	move seedlings to the field

2 **Why does Abdul keep some seeds?** [1]

To plant next year: the life cycle starts again.

3 **Rice takes about 4 months from planting to harvest. How many weeks is that?** [1]

about 16–17 weeks

Show what you know

★★★
Grade 3

Learning goals

- Use plant words.

1 Find the words.

C	P	N	E	G	R	O	W	L
R	N	**F**	**E**	**R**	**N**	K	B	P
W	O	N	A	R	**R**	**O**	**O**	**T**
J	M	N	**F**	**L**	**O**	**W**	**E**	**R**
C	**S**	G	**S**	**T**	**E**	**M**	O	R
F	**E**	**L**	K	S	S	P	S	V
C	**E**	**E**	I	W	E	E	K	I
V	**D**	**A**	K	V	Y	H	L	O
I	B	**F**	T	**F**	**R**	**U**	**I**	**T**

fern flower fruit leaf root seed stem

2 Which plant has no flowers? [1]

○ mango
● **fern**
○ rice

3 A seed starting to grow is called... [1]

● **germinating**
○ flowering
○ wilting

4 Challenge. Why do plants make so many seeds? [2]

Many seeds are eaten or land in bad places, so making lots means some will grow.
